

Future Lighting Solutions offers LED Systems and Solutions at Strategies in Light Japan

Yokohama Japan (August 24, 2010) – Future Lighting Solutions announced today that they will present next generation lighting technologies and application demos at the upcoming LED Japan – Strategies in Light conference in Yokohama, Japan. The 3-day conference, starting September 29, 2010, showcases in-depth information about the newest LED products and technologies. Future Lighting Solutions' solid-state lighting experts, coupled with LUXEON LED expertise from Philips Lumileds engineers, will share various integrated functions of leading edge LED technology, LED drivers, LED Light Modules, motion sensors, wireless communications and color mixing using Smart Control and Communication.

Visitors at the booth will see:

- **Tunable White Interior Light Fixture**
This tunable white fixture offers multiple CCT controls while maintaining a high color rendering index to show the true colors of objects. A typical application is in a retail store, to reflect the true colors of clothing.
- **Smart Task Light**
This demo provides an experience of lighting control through a wireless controller and/or PDAs, leveraging Internet communication.

Future Lighting Solutions will be exhibiting in Booth A-01 at the show in Yokohama. More information on the conference is available at <http://www.futurelightingsolutions.com/en/information-center/events-seminars/Pages/index.aspx>.

Future Lighting Solutions is the leading provider of LED lighting components and support services for solid-state lighting products and installations, including lighting engineering expertise, concept development, system solutions and online tools that accelerate quality application development.
