

## Future Lighting Solutions Enables Global Tech LED in Converting HID Fixtures to LED Lighting

**MONTREAL, CANADA (August 10, 2011)** - Future Lighting Solutions is pleased to announce a successful collaboration with Global Tech LED, in implementing energy efficient LED solutions for state roadways and commercial lighting applications.

“Replacing good fixtures with new ones is wasteful, and increases the payback exponentially,” explained Gary Mart, Managing Partner for Global Tech LED. Mart continued, “By converting existing fixtures to LED technology the payback period is much shorter.”

Future Lighting Solutions provided optical engineering support, as well as LUXEON® Rebel LEDs and 480V Philips Advance Drivers. This successful combination of product and optical engineering will be incorporated into various High Mast State Roadway projects Global Tech LED is currently undertaking.

“Global Tech LED is currently focusing its efforts where no other LED fixture manufacturer has gone before, reaching new heights by successfully replacing high wattage lamps (400-1000W) in high mounting applications from between 40-150 feet,” explained Jeff Newman, Managing Partner at Global Tech LED.

“The High Mast project is yet another example of how Future Lighting Solutions works with customers to develop energy efficient products, and assists them in accelerating the process from concept through to design and implementation,” said Salvatore Pepe, Americas Business Director for Future Lighting Solutions.

## **About Global Tech LED**

Global Tech LED is a USA leader in solid-state lighting technology. Our patent-pending Solstice Retrofit Kits are certified by Lighting Facts CM Label – a program developed by the U.S. Department of Energy’s DesignLights™ Consortium (DLC). Our sophisticated lighting solutions deliver unparalleled quantity and quality of light while reducing grid dependency to positively impact your bottom line. We provide LED Retrofit Kits and New Fixtures, as well as Sustainable Solar LED products. Global Tech LED’s products are ARRA compliant, designed and manufactured the U.S.A.

## **About Future Lighting Solutions**

Future Lighting Solutions is a leading provider of solid-state lighting technologies, engineering expertise and online simulation and design tools to facilitate application development and accelerate customers’ time to market. Our comprehensive portfolio includes a broad selection of LED system components, as well as integrated or customized solutions to enable cost effective, energy efficient lighting applications.

From retrofitting bulbs to building LED systems from the ground up, we offer industry leading LEDs, optical solutions, power modules and ICs, passive and active thermal solutions, light engines, modular systems, planar lighting and remote phosphor technologies.

Our world-class team of lighting experts, along with our global lighting resource centers, supply chain solutions and network of specialized partners, ensures the highest quality solid-state lighting solutions for customers.

The company is a division of Future Electronics. For more information visit:
