

## **Future Lighting Solutions Wins 2011 Best LED Application Award**

**SHANGHAI, CHINA (December 21, 2011)** – Future Lighting Solutions received the 2011 Best LED Application Award at the 8<sup>th</sup> annual LED Technology and Market Summit held at the Ritz-Carlton in Shenzhen on November 18, 2011. The company was recognized for its Pearl River installation project completed earlier this year.

The Summit hosted over 300 attendees and included more than 100 participating LED companies. A survey was conducted by OFweek via online voting among professional judges in the industry. Only 3 out of 119 projects submitted for consideration were awarded this distinction.

Future Lighting Solutions was selected based on the company's capabilities in providing full support and solutions for a landscape lighting project along the Pearl River, using 30,000 LED fixtures with 700,000 LUXEON® Rebel LEDs which have proven effective, reliable, and have realized both an 80% reduction in carbon dioxide emission as well as a 60% savings in energy consumption. The impressive installation will reach the Guangzhou government's target return on investment (ROI) within just 3 years.

Aaron Wu, North China Sales Director for Future Lighting Solutions, said, "Future Lighting Solutions is committed to providing customers with complete LED lighting solutions. This award reinforces our dedication in providing excellent services and products for our customers throughout Asia and around the world."

### **About Future Lighting Solutions**

Future Lighting Solutions is a leading provider of solid-state lighting technologies, engineering expertise and online simulation and design tools to facilitate application development and accelerate customers' time to market. Our comprehensive portfolio includes a broad selection of LED system components, as well as integrated or customized solutions to enable cost effective, energy efficient lighting applications.

From retrofitting bulbs to building LED systems from the ground up, we offer industry leading LEDs, optical solutions, power modules and ICs, passive and active thermal solutions, light engines, modular systems, planar lighting and remote phosphor technologies.

Our world-class team of lighting experts, along with our global lighting resource centers, supply chain solutions and network of specialized partners, ensures the highest quality solid-state lighting solutions for customers.

The company is a division of Future Electronics. For more information visit:
