Future Lighting Solutions Releases Largest Ever All in One LED Lighting Solutions Guide

MONTREAL, CANADA (May 19, 2017) – Future Lighting Solutions is pleased to announce the release of its 12th annual All in One LED Lighting Solutions Guide. This definitive resource guide details the complete product offering for solid-state lighting solutions. LEDs, drivers, optics, thermals and wireless controls and accessories are all included in this comprehensive solid-state lighting guide.

The guide features a broad range of industry-leading suppliers and covers all the latest available solid-state lighting products and technologies.

“The 2017 guide encompasses over 300 pages and represents our most complete and ambitious guide ever. This is an invaluable resource for engineers and buyers alike,” said Jamie Singerman, Corporate Vice-President, Future Lighting Solutions.

The guide will also be published in multiple languages including simplified and traditional Chinese, Korean and Japanese.

Free copies of the guide are available by request by e-mailing Jasmine.Kim@FutureElectronics.com, or by downloading the file at FutureLightingSolutions.com.

About Future Lighting Solutions

Future Lighting Solutions is a leading provider of solid-state lighting technologies, engineering expertise and online simulation and design tools. Our mission is to facilitate application development and accelerate customers’ time to market. Our comprehensive portfolio includes a broad selection of LED system components, and integrated solutions that enable our customers to manufacture cost effective, energy efficient lighting applications.

We provide a comprehensive range of LED light sources including high-power LEDs, mid-power LEDs, low-power LEDs, CoB, LED arrays, LED modules and LED light engines. Our portfolio is completed with a range of optical solutions, LED drivers, passive and active thermal solutions, connectors and controls.

Our world-class team of lighting experts, along with our global lighting resource centers, supply chain solutions and network of specialized partners, ensure the highest quality solid-state lighting solutions for customers.

The company is a division of Future Electronics. For more information visit: www.FutureLightingSolutions.com.
