

LED Lighting for **Low Bay Lights**

Did you know

that you can
improve safety,
visibility, and save
up to 75%
in energy usage
by switching to
an LED system?

We Make ^{*your*} LED Lighting Solutions Simple
www.futurelightingsolutions.com

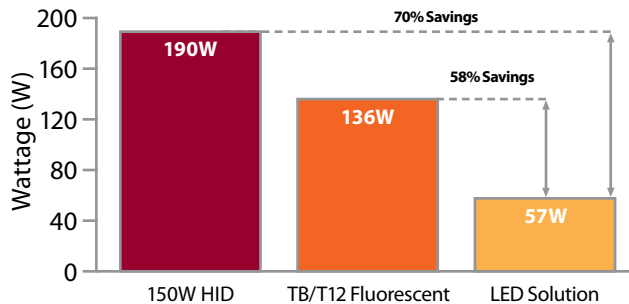

Solid-State Lighting Expertise • Product Concept Development
Complete System Solutions • Sustainable Supply

LED Lighting for Low Bay Lights

Significant increased energy savings can easily be achieved by adding dimming functionality and motion sensors. Since LEDs respond instantly, the improvements will be seamless and efficient.

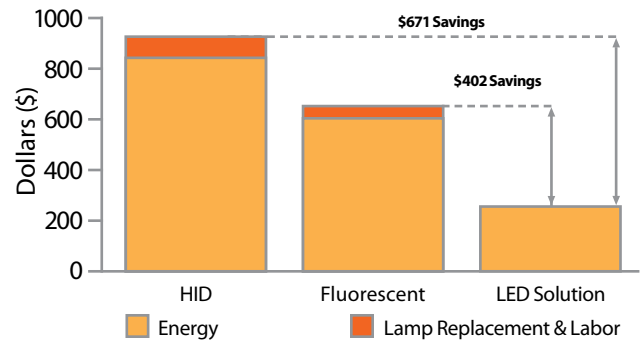

Savings

ENERGY SAVINGS

- Significant savings of over 58% compared to fluorescent and HID
- Can be further enhanced with dimming and motion sensors

5 YEAR LIFE CYCLE SAVINGS

- Reduced energy labor and lamp replacement costs

Enhanced Illumination and Lifetime

LUXEON® LEDs are directional light sources that allow for greater control to maximize efficiency and uniformity.

They also provide a superior color rendering index (CRI).

Benefits

- Improved safety & visibility
- Better CRI (color quality) and object recognition
- Improved light uniformity
- Life of LED product can target 60,000 hours (2x to 3x longer than traditional fixtures)

Eco-Friendly

LUXEON LEDs are far more energy efficient than other light sources and their long life and small size means far less waste.

Benefits

- Reduced coal and carbon emissions
- Easier, cheaper and safer to dispose
- Mercury and lead free
- Intelligent lighting controls reduce energy usage (dimming, ambient & motion sensors)
- Reduction of hazardous material (RoHS compliant)
